SUMMARY

Full-stack developer specializing in modern web applications using SvelteKit and Astro. Experienced in building performant client-facing websites, robust internal POS tools, and implementing seamless database architectures with PostgreSQL and Supabase.

EXPERIENCE

Freelance

Remote, Indonesia

Web Developer (Fullstack)

January 2024 - Present

- Delivered performance-focused websites and internal tools for clients with highly maintainable content structures.
- Built lightweight automations (e.g., document/invoice workflows) to reduce repetitive manual tasks for local businesses.

PROJECTS

Begin Again Custom POS System

January 2026 - Present

Internal Tooling (SvelteKit + Supabase)

- Designed and implemented a kiosk-style internal Point of Sale application to streamline order entry.
- Developed a PostgreSQL-backed transaction ledger with immutable audit triggers and materialized views for accurate COGS tracking.
- Successfully migrated database infrastructure from local instances to Supabase cloud hosting.

CHAMPS UI Website

April 2025 - Present

Company Profile (Astro + i18n)

- Built the official multilingual, performance-oriented site for the Center for Health Administration and Policy Studies.

EDUCATION

Universitas Gadjah Mada

Bachelor of Engineering in Nuclear Engineering • GPA: 3.56 / 4.00

Nuclear Engineering

August 2018 - March 2023
